Optimizing selectors cont.

- **Avoid the universal selectors**

```
// Slow
$('div.container > *');
// Faster
$('.container').children();
```

- **Avoid implied universal selectors**
  - ➢ It's recommended to prefix a pseudo-class selectors (beginning with :) with a tag name or other selector. Otherwise, the universal selector (*) is still implied.

```
// Don't
$('.category :radio');
// Do
$('.category input:radio');
```
