Don't mix CSS with jQuery

- Don't set the CSS styles for element directly. Using CSS class instead.

```
// Don't
$('#button').css({ 'background-color': '#5cb85c',
  'border-color': '#4cae4c'});

// Do
.success { background-color: #5cb85c;
   border-color: #4cae4c;
}
$('#button').addClass('success');
```
